

Yorkshire

Previous car parking space is now inaccessible due to changes in the rail bridge surface. Pedestrians can still access the reserve from this entrance.

An alternate car parking space is available just inside the reserve. Take a sharp left 400m after crossing the railway bridge. 400m along this track is a left turn; cars can be left on the edge of this road.

Pedestrian access to the reserve can then be gained via a field gate, which is next to the locked main gate on the track. Turn left after going through the field gate to reach the main track on the other side of the main gate.

Previous car parking space:
no longer in use

New car parking space
