

The table below shows the dates and times when high tides at Spurn are predicted to be at or above 6.8m. When tides are at or above 6.8m, it is likely that the sea will wash over the beach and into the estuary

**For your safety, we recommend observing a one hour safety window before and after the high tide time dangerous and should not be attempted**

Please note that on some dates there may be more than one high tide. Visitors should be aware that weather conditions can also have an impact on tide height, and we strongly advise checking the weather forecast and tide times ahead of your visit
